

This comment is in regards to the LPFM broadcast service. I strongly oppose this service due to the affect it will have on the existing AIR 1 radio sation. This station serves many homes and families in my local community who greatly benefit from the positive message and encouragement AIR 1 provides for its listeners.

If AIR 1 was to cease in existence, many people would be affected. AIR 1 is a radio station that helps change lives with messages of hope and answers to tough questions. If it no longer existed, people who have already gained so much from listening to AIR 1 and continue to listen, along with those who would potentially be touched or impacted by AIR 1 in the future would miss out.

Having AIR 1 as a local radio station is in the public interest because it has the potential to change peoples' lives for the better, and a changed person is a benefit to society. AIR 1 is a beacon of light in the midst of a dark world and without it, our local and extended community would suffer greatly.
